

Monitoring Report Fund for Social Change

The Fund for Social Change requires each grantee to submit two Monitoring Reports a year on the progress of projects supported by the Fund. The reports are to be submitted after six months and at the end of the grant year. These status reports are to be based on the Work Plan submitted with the project proposal.

In addition to the questions below, please submit a matrix listing:

- **the project's objectives**
- **activities and dates of completion**
- **achievements**

Please also indicate how the projected activities, achievements and dates of completion differ from the project Work Plan. Indicate the reasons for any differences.

Please include a narrative report to amplify any of the issues raised in the matrix. The narrative should describe the plans for the project beyond the grant period.

The final report should contain an expense report on the use of these funds and an audited financial statement for the organization.

Monitoring reports for projects in which consumers are involved either as advocates or as service recipients need to include feedback from them.
